

Product Process

1

Acquisition of Raw Material

Premium-grade raw materials are procured from a blend of domestic and foreign vendors, and are meticulously and methodically stockpiled in the warehouse under tight security measures.

2

Assembling of Products

Our ultimate product is the result of assembling individual components that are manufactured by our team. Our personnel are trained to adhere to globally recognized procedures for assembly. Our adept workforce ensures that each batch undergoes extensive trials to examine its functionality before it is dispatched. This meticulous process guarantees PrintoDome's assurance of the highest quality standards.

5

Transportation

We partner with the most efficient and dependable transportation service to ensure your product is delivered to your doorstep without delay. With Printodomes services, you have access to timely delivery of goods and the ability to track your shipment. No need to wait longer than necessary for your product to arrive.

3

Packaging

At PrintoDome, we prioritize safe and sustainable packaging. We use cardboard and paper packaging and expertly sealed black polybags to protect against damage. We're committed to minimizing our carbon footprint and being socially responsible.

4

Warehousing

Our management system guarantees that we always have a fresh supply of PrintoDome products available to meet the growing demand.
